UMBC

AN HONORS UNIVERSITY IN MARYLAND

RESEARCH EXPERIENCES FOR UNDERGRADUATES

Interdisciplinary Program in High Performance Computing

University of Maryland, Baltimore County (UMBC) Summer 2010 and Summer 2011 www.umbc.edu/hpcreu

Key Elements:

- eight weeks for eight students
- UMBC is located in the Baltimore-Washington corridor of industry and government agencies
- team work with dedicated graduate student mentors and faculty instructors
- professional development workshops; GRE prep course; poster presentation; technical report and publication opportunities
- no cost to the participants

Unique Features:

- fully transferable three-credit course on parallel computing with MPI using the <u>UMBC High Performance Computing Facility (HPCF)</u>
- includes introduction to tools of scientific and statistical computing: MATLAB, SAS, R, Linux, LaTeX
- interdisciplinary projects with clients from industry and government agencies through the <u>Center for Interdisciplinary Research and</u> <u>Consulting (CIRC)</u>
- field trips to local industry and government labs; optional trip to SIAM Annual Meeting 2010 in Pittsburgh

Department of Mathematics and Statistics, <u>www.math.umbc.edu</u> University of Maryland, Baltimore County (UMBC), <u>www.umbc.edu</u>

<u>Dr. Nagaraj K. Neerchal</u>, Professor of Statistics <u>Dr. Matthias K. Gobbert</u>, Professor of Mathematics
